

## Travel Consulting Company

**General assumption:** One consultant or team will never have NO assignment (i.e, will always be assigned to something)

## DVD Company

**Assumption 1:** All branches have at least 1 DVD

**Assumption 2:** As written in the description, 1 copy of a DVD will always contain 1 movie, making DVD:movie 1:1.

**Assumption 3:** 1 copy of a DVD can ever only exist at one branch at a time, since it's a physical object. As a result, the DVD:branch is \*:1 as opposed to many-many.

**Assumption 4:** the movie's title is also associated with the DVD (for simplicity's sake)

**Assumption:** a branch will always have at least 1 employee.
